Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Takiguchi et al.

This patent shows a magnetic rubber composition having incorporated therein strontium ferrite, barium ferrite, silane coupling agents, lubricating agents and nitrile butadiene rubber. See specifically column 7 lines 10+. The only difference seen between this disclosure and the instantly claimed invention is the specific selection of a hydrogen nitrile butadiene rubber having the percentage of acrylonitrile as set forth as well as the hydrogenation ratio. The Examiner maintains that it would be prima facie obvious to select this specific ingredient from this recitation in the prior art. The motivation to select this ingredient stems from the fact that this ingredient is a known and commercially available species of nitrile rubber which is generically called for within the prior art. It is prima facie obvious to select a commercially available specific embodiment

when the genus is called for. It is herein maintained that the recitation of nitrile rubber is sufficient so as to direct one of ordinary skill in the art to commercially available nitrile rubbers of which the hydrogenated rubber as claimed is one. Applicants have failed to show or allege any unexpected results due to the specific hydrogenation ratio and/or amount of acrylonitrile. As such, the claims are rendered prima facie obvious.

Applicants' Information Disclosure Statement has been considered. Applicants should note that the Japanese Document No. 63-284804 as listed on the 1449 is not of record. Applicants should provide a copy of this document.
